Problems

01

No Unique Brand Identity

The platform does not allow individual transport companies to build and promote their own brand identity, reducing their ability to differentiate themselves from competitors.

02

Limited Service Customization

Companies have little flexibility to provide customized services such as airport pickups, private hires, or curated tour experiences for customers.

03

Restricted Operational Control

Businesses depend on a shared system infrastructure, limiting their control over pricing, service settings, and operational decisions.

04

Non Trustable Agents

Unverified or poorly regulated agents reduce trust due to low transparency, inconsistent service quality, and miscommunication, negatively affecting user confidence.

Existing Solutions & Their Gaps

SLTB e-Seat Reservation

- Mainly for government bus seat reservations
- Fixed service structure
- Limited flexibility for private operators

My Traveller

- Basic bus ticket booking only
- No airport hire services
- No tour package support
- Limited user experience

Shared Platforms (e.g BusSeat.lk)

- Basic online booking support
- Shared customer base
- Limited operator branding and service customization

Common Gaps

- No integrated platform for bus + airport + tours
- Limited pricing flexibility
- No direct customer relationship management
- Generic user experience
- No support for operator branding

Target Market

Proposed Solutions

Bus Ticket Booking

Full control over your fleet, routes, schedules, and ticket sales.

Airport Hire Bookings

Flexible airport transfers with custom pricing and scheduling.

Customizable Tour Packages

Personalized upcountry tours based on customer preferences.

Full Pricing & Availability Control

Tailored interface designed for better usability and satisfaction.

Customized User Experience

Dedicated platform to promote your own brand, not third parties.

Strong Brand Presence

Build loyalty and gain insights through direct customer interaction.

A9 Express is a unified online transport booking platform that simplifies private bus reservations, airport transfers, and tour bookings while giving operators full control over services and customer management.

Client Collaboration Evidence

Feasibility Snapshot

TEAM FEASIBILITY

- Mobile app development
- Web development
- Database design
- Cloud deployment

TIMELINE FEASIBILITY

- 8 weeks – System design
- 4 months – Development and testing

RESOURCE FEASIBILITY

- The required software tools and cloud resources are affordable and available.

@shadcn

Unique Value Proposition

1. THREE MAJOR TRANSPORT SERVICES

- Private bus ticket booking
- Airport transfer booking
- Tour package booking

3. BENEFITS FOR USERS

- Convenience through one application
- Real-time booking visibility
- Easy access to multiple services

2. BENEFITS FOR OPERATORS

- Full pricing control
- Better customer management
- Service customization
- Branding opportunities

Risks & Mitigations

Risk 1: Payment Security & Fraud Risk

- Mitigation Strategy: Implement secure payment gateways (Stripe/PayPal), SSL encryption, OTP verification, and fraud detection systems.
- SDG Impact: SDG 9 (Industry, Innovation & Infrastructure), SDG 16 (Peace, Justice & Strong Institutions)

Risk 2: System Downtime / Reliability Issues

- Mitigation Strategy: Use cloud infrastructure (AWS auto-scaling), load balancing, caching, and perform stress testing.
- SDG Impact: SDG 9 (Industry, Innovation & Infrastructure), SDG 11 (Sustainable Cities & Communities)

What concerns would you have about using an online booking platform?

118 responses

Risk 3: Low User Adoption / Resistance to Digital Booking

- Mitigation Strategy: Provide a simple UI, multilingual support, tutorials, SMS confirmations, and hybrid booking options.
- SDG Impact: SDG 4 (Quality Education), SDG 8 (Decent Work & Economic Growth)

Q&A

THANK YOU
